(54) Title: A PNEUMATIC OR HYDRAULIC CYLINDER LOCK ASSEMBLY

(57) Abstract: A hydraulic cylinder (10) having a piston rod (13) that receives a retaining member (38). Moving with the piston rod (13) are spherical lock members (26) that are moved radially by the retaining member (38) to lock the piston rod (13) in the retracted position. The retaining member (38) upon fluid being applied thereto is moved to a position permitting radial inward movement of the members (26) so that the rod (13) is released.
